REASON FOR PRODUCT REMOVAL:

Product may be contaminated with *Listeria monocytogenes*

IN STORE LOCATION:

Natural/Organic Section

STORE ACTIONS

Pull products as specified in the table above. Check in store location and all areas of the store where this product may be displayed or stored, including adjacent shelves in case product was pushed behind another product. If applicable, compare the amount of the product removed against the CGO on hand inventory to ensure you have accounted for all packages.

SHELF SIGN:

Attach shelf sign where product has been removed

PRODUCT DISPOSITION INSTRUCTIONS:

1. Destroy the product by opening the package and discarding the contents into a plastic trash bag. Discard the empty packaging material in a separate plastic trash bag.
2. You **MUST** record the number of packages you removed in the Task Manager survey in order to receive credit. Counts will be verified against supplier shipping records.
